Dear Ms. Hesse:

As President of a St. Louis area company, I am in full support of the settlement that has been reached between the Justice Department and Microsoft.

Microsoft is a very important part of the technology sector of our economy and we must do everything possible to strengthen all parts of the American economy. Further litigation will accomplish nothing to stimulate the economic growth that we need.

Competition has helped to create an American economy that is the envy of the world. We must seek to increase competition in our economy because that is the key to increased demand for our products and services. Continued legal action against Microsoft will not increase competition.

Further litigation against Microsoft should cease.

Very truly yours,
